

PLEASE BE RESPONSIBLE

For every kitten or puppy that finds a happy home, four others are unwanted, unloved and possibly neglected or abused. Don't be part of the problem...be part of the solution! Spaying and neutering your pet not only helps reduce the number of unwanted pets, it provides long-term health benefits to your dog or cat.

**Prevent A Litter –
Why it's Good for You and Good for your Pet**

Spayed and neutered pets are better, more affectionate, companions.

Neutered cats are less likely to spray and mark territory.

Spaying a female dog or cat eliminates its heat cycle, which can last twenty-one days, twice a year, in dogs, and anywhere from three to fifteen days, three or more times a year, in cats.

Females in heat often cry incessantly, show nervous behavior, and attract unwanted male animals.

Spayed and neutered pets are less likely to bite. Unaltered animals often exhibit more behavior and temperament problems than those that have been spayed or neutered.

Prevent a Litter - It's Good for Your Pet

Spayed and neutered dogs and cats live longer, healthier lives.

Spaying female dogs and cats eliminates the possibility of uterine or ovarian disease and greatly reduces the incidence of breast cancer.

Neutering male dogs and cats reduces the incidence of prostate cancer.

Neutered animals are less likely to roam and fight.

Please call our office with any questions on Spay or Neutering, our Veterinarians and Staff will be happy to help
